I will call in, though. I met face-to-face with Richard yesterday. CZARA was definitely a key concern of Richard's. And he came out pretty forcefully on the need for his state to do more on both Forestry and Ag.

Importance: High

Unfortunately neither Don nor I will be able to attend this second meeting with Richard Whitman. **Ex. 6 - Personal Privacy**
I apologize for the short notice.

All--

We now have call-in info and rm # if you would like to join us although EPA will have an opportunity to talk with Whitman the day before.

Thurs. May 8th 10:00-11:00 am EDT

Rm: Commerce Building (HCHB) A128. Apparently this is in the subbasement and per our Legislative Affairs folks that are setting up the meeting you can get there by entering the building through the 14th and Penn entrance and take the stairs all the way down.

Non-Responsive

Allison

FYI--Wanted to give you a heads up that we just found out this morning that Richard Whitman, with OR's Gov's Office, will be in DC next week and has requested to meet with NOAA about CZARA and another issue around the Columbia River.

Given his schedule and ours, we had a very narrow window of availability. The meeting has been set for 10:00-11:00am in the Commerce building downtown. I believe Joelle, me and potentially John King, our Acting Office Deputy Director, will attend to speak on CZARA.

EPA HQ folks, we welcome you to join us in person. I haven't been given a room number yet but when I do, will pass along. I believe folks are seeing about potential for a call-in too if EPA R10 wants to wake up bright an early.

We can discuss more during the call tomorrow.

Four Feynman diagrams representing the four-point function at one-loop order. Each diagram consists of two external wavy lines and two external straight lines, connected by a loop of two straight lines. The diagrams are arranged horizontally and separated by plus signs.
